

Happy Holidays Everyone!

The birth of our Savior, Jesus Christ is upon us. Rejoice! Enjoy this time with your family and friends. I wish you good health and happiness in 2012.

**Warm Regards,
Linda**

Cajun Expedition

New Orleans, Graceland, Anheuser Busch Brewery and much more!

Friday, May 4 - Friday, May 11, 2012

Winter Driving

It is important to check and winterize your vehicles before the winter season begins. Keep your gas tank near full to avoid ice in the tank and fuel lines. Make sure your car's battery is in good shape - cold temperatures can reduce the effectiveness of a battery by 50 percent.

Be gentle with both the accelerator and brake. If the rear of your car begins to slide on snow or ice, turn in the other direction of the skid. Expect a second skid as the car straightens out, and be prepared to counter this sliding action. Carry a winter storm survival kit that includes:

- Blankets or sleeping bags
- Flashlight with extra batteries
- First-aid kit
- Shovel, tools, booster cables & windshield scraper
- High - calorie non-perishable food (raisins, candy bars, energy/ protein bars, etc.)

Joke of the Day

A Sunday school teacher asked, "Johnny, do you think Noah did a lot of fishing when he was on the Ark?" "No," replied Johnny, "How could he, with just two worms."

Keep Warm & Safe

Frostbite is damage to body tissue caused by extreme cold. A wind chill around -20 degrees F could cause frostbite in just 15 minutes or less. Frostbite causes a loss of feeling and a white or pale appearance in extremities such as fingers, toes, ear tips or the tip of the nose. If symptoms are detected, seek medical care immediately!

Hypothermia is a condition that develops when the body temperature drops below 95 degrees F. It is very deadly. Warning signs include uncontrollable shivering, disorientation, slurred speech and drowsiness. Seek medical care immediately!

Overexertion is dangerous. Cold weather puts an added strain on the heart. Unaccustomed exercise such as shoveling snow or pushing a car can bring on a heart attack or make an existing medical condition worse.

Pets also need extra care when the temperatures fall. They should be brought inside when the temperature reaches 30 degrees F with wind chill. Dogs and cats can get frost bitten ears, nose and feet if left outside during bitter cold weather. Chemicals used to melt snow and ice can also irritate pets' paws - be sure to keep anti-freeze, salt and other poisons away from pets.
