Carefull | HORICON BANK The Natural Choice

How Carefull uses & keeps your data safe

Identity

Carefull monitors the dark web to see if your email, address, phone, passport, drivers license, and social security number are exposed in a data breach. Carefull never stores your social security number.

Credit

Carefull uses your social security number (but does not store this information) to monitor your credit for all activity. We alert you to every event we detect so you can take action quickly in the case of fraud.

Finances

Carefull monitors Horicon Bank and any connected non-Horicon Bank accounts for the latest threats, unusual patterns, signs of fraud and scams, and even common money mistakes. Carefull connects with your account login and password but does not store this information for your security.

Home

Carefull monitors your address for all new title activity (including mortgages) and change of address fraud.

Carefull's Security Practices

Military-grade encryption

Carefull uses the highest level of encryption and security to keep your data safe.

Carefull never stores your bank login or social security number

Once your monitoring is activated, no banking or social security credentials are stored in Carefull's system.

All analysis is view-only

Carefull cannot access or move money from your accounts. No one can ever access your bank account directly from Carefull.

Layers of security and verification

Carefull uses two-factor authentication and requires all Carefull members to re-verify when they access secure vault .

US-based human support

All Carefull fraud experts and customer support are US-based and available 7 days a week.
